

The Coffee Break Guide to Business Plans

Mini Business Plan

Instructions

Read through the list of questions designed to help you with some basic business goals. Spend only a few minutes thinking about each question, then write a couple of sentences or bullet points to express your ideas. Remember, this is designed to take you about one coffee break (around 15 mins)

1. How many books do you plan to write this year? In what genre(s)?
2. What's your projected word count for each book?
3. When will you finish each project OR How much time will you need to complete each project?
Don't forget to build in time for critiques, beta readers, editing, and all those other activities besides actually writing the book.
4. How will you publish these books? Traditionally, self-published, or a hybrid approach?
If you're planning on publishing traditionally note who your targeted publishers and/or agents are for each project. If you're planning on self-publishing note which retailers you plan to sell your books at.
